

August Newsletter 2017

In this month's newsletter we have the TruPunch 3000 on offer as our machine of the month. We have also have had a 2004 6 x 2 metre TRUMPF L 6050 arrive in Holland. Additionally, with this month's edition, we also discuss TRUMPF's financial growth and what is happening in the British manufacturing and engineering industry.

Severn Machines Ltd

TruPunch 3000 (S11)

Are you looking for a punching machine that is energy efficient, highly productive with intelligent functions? New to Severn stock is this TruPunch 3000 from the year 2013 with automation giving you load and unload capability, and with only 19,000 hours on the machine.

The TruPunch 3000 offers skeleton-free processing, therefore saving material. Additionally, with the electric punching head you can punch with an average power input of only 5.6kW. Furthermore, with the descending die, sheets of up to 6mm can be processed with minimal scratching!

Machine Details

CNC Punching is a sheet metal manufacturing process that is carried out by punch machines. The machine is programmed to move a sheet of metal in an X and Y direction to accurately position the sheet under the machine's punching head ready to punch a hole or form.

Punching Machines

We also have a 2001 TRUMPF TRUMATIC 5000R, 2007 TRUMPF TruPunch 5000, a 2004 TRUMPF TRUMATIC 3000R and a 1998 TRUMPF TRUMATIC 200 available.
